MANAGEMENT DISCUSSION AND ANALYSIS

Overall Review

Floriculture or flower farming is the study of growing and marketing flowers and foliage plants. Floriculture includes cultivation of flowering and ornamental plants for direct sale or for use as raw materials in cosmetic and perfume industry and in the pharmaceutical sector. It also includes production of planting materials through seeds, cuttings, budding and grafting. Worldwide more than 140 countries are involved in commercial Floriculture. The leading flower producing country in the world is Netherlands and Germany is the biggest importer of flowers. Countries involved in the import of flowers are Netherlands, Germany, France, Italy and Japan while those involved in export are Colombia, Israel, Spain and Kenya. USA and Japan continue to be the highest consumers.

The floriculture industry in India is still at its nascent stage and a large portion of its potential remains untapped. The Indian floriculture industry has shifted from traditional flowers to cut flowers, mainly for export purposes. Modernization and the growing western cultural influences has resulted in the growth in demand for flowers amongst the consumers in India – especially the young. Apart from this, there is also a huge spurt in the demand for flowers during festivals. This growth in demand for flowers has impacted its retailing in India. The report states that in terms of rupee value, the industry has grown at a CAGR of nearly 20% in the last five years.

Currently, most of the flower cultivators entering the business seek to create a niche in the global market. Fresh flowers from India are being exported to several countries such as the USA, UK, Netherlands, Japan, Germany, and United Arab Emirates etc. The credit for the growth in exports goes to the various initiatives introduced by the government. The floriculture industry has been identified as a priority sector by the government and has accorded it 100% 'export oriented unit' (EOU) status. It has also facilitated 100% foreign direct investment, encouraging joint ventures, a steady flow of capital and the establishment of state-of-the-art technologies for its cultivation, storage and transportation.

Industry Structure and Development

In the recent years it has emerged as a profitable agri-business in India and worldwide has led to an increase in the demand of floriculture products in the developed as well as in the developing countries worldwide. The production and trade of floriculture has increased consistently over the last 10 years.

In India, Floriculture industry comprises flower trade, production of nursery plants and potted plants, seed and bulb production, micro propagation and extraction of essential oils. Though the annual domestic demand for the flowers is growing at a tremendous rate and international demand are increasing at a very high note. India's share in international market of flowers is negligible.

The country has exported 19726.57 MT of floriculture products to the world for the worth of Rs. 57141.28/- lakhs in 2018-19 which is 12.64% more than the value in F.Y. 2017-18.

Opportunities and Threats/Risk and concern

A growing market for flowers at domestic, national and international level in which demand exceeds the supply, and the world demand is estimated to grow anywhere between 15% and 25% per annum. The high production costs in developed countries provide opportunity as they rely largely on imports.

Threats to the industry include unavailability of proper logistic partner and flowers are highly perishable, high rate of import duty on Indian cut flowers, unavailability of cold storage units at airports etc.

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We have also

The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- ii) Obtained an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls

If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- v) Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards. From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March 2018, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.
